Ash Grove® Concrete Crack Seal

Ash Grove® Concrete Crack Seal is a weather-resistant, latex crack filler designed to repair small cracks, holes and fractures in horizontal concrete surfaces.

Excellent adhesion, outdoor durability and weather resistance to protect against costly water and ice damage. Ash Grove® Concrete Crack Seal is a high solid, ready-to-use polymerized material formulated to fill and seal cracks. This product is pourable and comes in a

convenient hand-held squeezable bottle. Recommended for repairing cracks in concrete, masonry, stucco, use on driveways, patios, sidewalks, garages, and warehouse floors.

Ash Grove® Concrete Crack Seal has several advantages including ready to use-requires no mixing, for interior or exterior use, pourable, dries to touch in 30 minutes, excellent adhesion, weather-resistant seal and remains flexible for continued protection. One 1 qt. bottle fills approximately 35 linear feet.

Features, Benefits & Procedures

Remove all broken and loose concrete from the crack to be repaired to ensure strong bond with the material. Rigorously and thoroughly clean surface area with hot water and a stiff brush to remove grease, oil, paint, dust and any other foreign materials, leaving the surface saturated but free of standing water.

For best results use a pressure washer to clean the surface. Shake bottle of Ash Grove® Concrete Crack Seal well before using. Cut tip at an angle, allowing a 1/4" to 3/8" opening. Simply squeeze Ash Grove® Concrete Crack Seal into cracks up to 1/2" thick and 1/2" deep. For cracks over 1/4" thick, apply in layers of two or more beads.

Allow each layer to dry for 24 hours between applications. Caulk can be tooled to even out the surface.

For optimum performance, apply in dry weather above 40°F. Do not apply if rain is expected within 24 hours. Ash Grove® Concrete Crack Seal is not recommended for repair of large cracks more than 1/2" thick and deeper than 1/2". Protect from freezing.
